

Cemplas focuses on car park refurbishment and care

Cemplas Waterproofing and Concrete Repairs Ltd is one of the UK's leading independent car park specialists, renowned for high quality, affordable and reliable service for owners, asset managers and parking operators.

As part of the company's programme of continued expansion it has appointed Wayne Madge as Business Development Manager with a brief to maximise direct business opportunities in the car park refurbishment market where he has extensive experience.

These developments, together with an understanding of the basic principles of car park deterioration, is of paramount importance in Cemplas's ongoing commitment to car park refurbishment and care.

Cemplas recognises that every car park structure is unique and will require a unique repair strategy. This may be to fulfil a DDA or Health and Safety requirement, to comply with an obligation to repair, or form part of a Life Care Plan initiative.

Operating as Principal Contractor alongside Asset Management teams, Building Surveyors and Engineers we ensure that the client's requirements are fully understood and interpreted in a proactive, bespoke and cost effective manner.

A new Car Park brochure is available to download from the Cemplas web site together with a new Specialist Services brochure, and a new Concrete Testing methods brochure.

Current Business Development Director Paul Stacey moves to the role of Commercial and Marketing Director.
